

GAYATRI KASHYAP

Frontend Developer | React.js | TypeScript

6394160251 | kashyapgayatri151@gmail.com | Lucknow, UP | linkedin.com/in/gayatri02b | github.com/Gayatrieva

PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive, performance-optimized web applications using React.js, TypeScript, JavaScript, Tailwind CSS, Redux Toolkit, TanStack React Query, and REST APIs. Skilled in component-based UI development, dashboards, authentication workflows, API integration, multilingual localization, and single-page application (SPA) architecture. Experienced across the full stack with Node.js, Express.js, and MongoDB.

EXPERIENCE

Front-End Developer Intern

Feb 2024 – May 2024

Webistic.in

- Upgraded applications to the latest React.js version, improving performance and reducing bundle size.
- Optimized API handling using async/await, minimizing redundant network requests and improving data-fetching efficiency.
- Developed backend routes using Node.js and Express.js to support frontend data integration.
- Managed MongoDB collections and implemented CRUD operations for efficient data handling.
- Improved UI responsiveness across devices and collaborated with design and QA teams to enhance usability.

PROJECTS

TAQA Platform — B2B Supplier Management Platform

React.js, Tailwind CSS, Redux Toolkit, TanStack React Query, Axios, i18next, Shadcn UI, Radix UI, Vite, Framer Motion

- Designed and developed the complete frontend architecture and user interface for a modern B2B supplier management platform.
- Built responsive, performance-optimized single-page application (SPA) interfaces with React 19 and Vite 6 using reusable component architecture and accessibility-focused UI patterns.
- Developed Admin and User dashboards with structured navigation, analytics views, supplier management, profiles, authentication workflows, notifications, support, and payment-related interfaces.
- Implemented multilingual localization using i18next and React-i18next with English, Arabic, and Chinese translations, and added smooth animations and modal transitions using Framer Motion.
- Integrated backend APIs with Axios and TanStack React Query for server-state management, caching, synchronization, and error handling; managed global state with Redux Toolkit.

WorkRaze — Job Aggregation Platform

React.js, TypeScript, Tailwind CSS, Context API, Shadcn UI, Framer Motion

- Designed and developed the complete frontend architecture using React.js, TypeScript, Tailwind CSS, and Shadcn UI with a scalable, component-driven structure.
- Built responsive interfaces for job listings, advanced search, and filtering by role, company, and location.
- Integrated REST APIs with asynchronous data fetching, loading states, caching, and error handling for a seamless user experience.
- Managed authentication, session persistence, and application-wide data using Context API and implemented protected routes.
- Implemented responsive layouts and interactive transitions using Framer Motion.

EDUCATION

Master of Computer Applications (MCA)

Aug 2024 – Jun 2026

Panipat Institute of Engineering and Technology

Bachelor of Vocational, Software Development and E-Governance

Aug 2020 – Apr 2023

National Post Graduate College

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, HTML5, JSX

State & Data Management: Redux Toolkit, Context API, TanStack React Query, Axios

Backend: Node.js, Express.js, REST APIs

Databases & Tools: MongoDB, PostgreSQL, Docker, Git, Postman

UI & Libraries: Shadcn UI, Radix UI, Framer Motion, i18next

Core Concepts: REST API Design, JWT, OAuth2, RBAC, Responsive Design, SPA Architecture
